

Multiple Capabilities in a Single Platform

ReadyOp is a secure web-based platform integrating planning, response, communications, radio interoperability and continuity of operations in one secure location. No additional equipment required, no software to be downloaded and dashboards are completely customizable, scalable and can be tailored for any situation or event.

At ReadyOp, we have worked with many Health Departments, Hospitals, Healthcare Coalitions and more for more than 11 years. Let us show you how ReadyOp benefits these organizations with the following, in a single platform:

- Hospital Incident Command System (HICS)
- Planning, Operations, Communications
- Patient and Bed Status Tracking
- Alerts and Codes Notifications
- Text | Email | Alerts | Calls
- Continuity of Operations (COOP)
- Hazard Vulnerability Assessments (HVA)
- Situation Reporting
- Checklists, Tasks, Requests
- Mass Casualty Coordination
- Asset Management
- Volunteer Management
- Reunification
- and More

Planning, Comms, Response

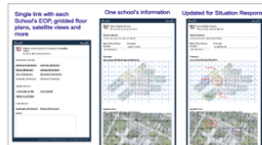

Fusion, Large Events

COOP, Resiliency

Active SitReps

Radio Interoperability

Forms, Reporting

ReadyOp provides the tools and capabilities to support your daily operations and responses with all of these and much more. Let us show you how ReadyOp can benefit your agency/organization/facility.

Easy to Learn | Easy to Use | Powerful and Proven

HIPPA Compliant | HTTP Secure
